

A key player in Innovative Materials

MICA selected for four ambitious projects: "Call for project: Value-creation – Carnot Institutes"

4 Future Investments projects - projects developed by MICA in collaboration with other Carnot Institutes - have been selected by the Prime Minister upon the proposal of the General Commission for Investment. These projects aim to help to develop French innovation. They benefit from the unique skills of the high-level research united within these Carnot Institutes. The objective is to conquer new markets in strong growth and develop innovative partnerships with SMEs and middle-market companies in the relevant sectors.

MICA's essential actions for particularly ambitious objectives

- Fashion and Luxury industry - "Carats Project"

Offering unique and innovative solutions to support SMEs and middle-market companies in the Fashion and Luxury industries to move towards niches where there is higher added value.

- Aerospace industry - "AirCar Project"

Helping to strengthen the competitiveness of SMEs and middle-market companies in the aviation sector within their markets, through the development of technical and innovative products.

- Mechanical Industries and Processes Industry (Factory of the Future) - "IMP Project"

Supporting SMEs and middle-market companies in the manufacturing industry for the creation of the factory of the future through increased technology transfer.

- Sports and Wellness industry - "Fast Sport'In Project"

Creating the products and services of tomorrow with SMEs and middle-market companies in the sports and wellness industry.
